Goal: Correlate pseudoscientific cognitive functions with scientific concepts
Motive: Sharpen cognitive theory to adjust by the Open-Closed Principle (open for extension, closed for modification) in addition to be irrespective of time
Target: Others with unpredictable and dynamic processing that affects consistent emotional understanding of information

Draft:
Irrational/Perceiving = 4 Fundamental Forces
Intuition = Subatomic
Sensation = Atomic
Ni = Weak Force
Ne = Strong Force
Se = Gravitational Force
Si = Electromagnetic Force

Rational/Judging (Demonstrative? Best with examples)
Rational/Judging Extroversion/Introversion =
Utilizing syntropy/entropy

Thinking = Isolated process
Feeling = Open process

Ambiguous = Closed process, exchange of energy only
